

Alexey Osipov

Moscow, Russia | osipovaajr@gmail.com | [GitHub](#) | [LinkedIn](#)

Profile

ML engineer with nearly three years of production experience in causal ML, experimentation, and constrained decision systems. B.A. in ML and Economics; incoming ITMO AI M.Sc. student. Interested in causal interpretability, AI evaluations, reliable model behavior, neuroscience, bioinformatics, and behavioral biology.

Research And Selected Projects

Daily Routines, Sport Access, and Wellbeing

2025–2026

Causal ML and behavioral data; ACM UbiComp/ISWC 2026 workshop paper

- Built a reproducible cross-dataset analysis of repeated behavioral diaries from DiversityOne (eight countries) and MIDUS/NSDE using person fixed effects, IPTW/MSM, residualized R-learners with grouped cross-fitting, and sensitivity analyses.
- Paper accepted for presentation at the 2nd DiversityOne Open Challenge workshop at ACM UbiComp/ISWC 2026; presented the broader thesis at the [CEBDA HSE scientific seminar](#) and Lomonosov 2026.

Auditable Personal AI Memory

2026

Public second-brain starter with context provenance

- Built a personal-agent backend that records source context and keeps feedback-driven instruction changes human-reviewed.

Personalised Treatment

2026

Causal ML and budget-constrained decision policies

- Built a personalised treatment-selection algorithm that estimates individual treatment effects and uses Lagrangian optimization to assign actions under a fixed budget.

Synthetic Time Series With Deep Generative Models

2024

Deep learning and forecasting robustness under dataset shift

- Worked with deep generative models for conditional time-series generation; implemented ETS decomposition and evaluation metrics for forecasting robustness.

Education

Higher School of Economics

2022–2026

B.A. in ML and Economics

Moscow, Russia

- Selected subjects: econometrics, machine learning, experimental economics, probability, optimization, and deep learning for text.
- Two-year Bioinformatics minor.

Moscow Institute of Physics and Technology (MIPT)

- Deep Learning School, 2022–2023.
- [Introduction to Molecular Biology and Biomedicine](#), MIPT/Stepik certificate, 2023.

Center for Mathematical Finance, Moscow State University

2022–2023

Data Science and Risk Analytics; Diploma with Honours

Moscow, Russia

Professional Experience

T-Bank

Sep 2025–Present

ML Engineer

Moscow, Russia

- Develop uplift models and constrained decision systems for personalized cashback, combining treatment-effect estimation, pricing, ranking, budget allocation, and offline evaluation.
- Built an agent-assisted development harness with scoped context, validation, and Kubernetes job execution, automating much of the ML experimentation workflow.

Yandex Delivery

Sep 2023–Mar 2025

Intern → Middle Data Scientist

Moscow, Russia

- Built ML models for personalized courier incentives and automated recurring A/B-test analysis for marketplace decisions.

Technical Skills

Programming and data: Python, SQL, pandas, scikit-learn, statsmodels, PySpark, Airflow, Git, Linux, Hadoop, Kubernetes, MCP, agent harnesses.

ML and research: PyTorch, deep learning, LLMs, uplift/CATE modeling, double machine learning, A/B testing, causal inference, forecasting, calibration, offline policy evaluation.
